EDUCATION

VNUHCM – University of Science

Ho Chi Minh City

Bachelor of Information Technology — CPA: 3.57/4.0 (8.3/10)

Oct. 2022 – Present

- Relevant Coursework: Software Architecture, Data Structures & Algorithms, Database Systems, DevOps Fundamentals

EXPERIENCE

Junior Software Engineer

Feb. 2026 – Present

Endava Vietnam

Ho Chi Minh City

- Developing and maintaining **MPGS** (Mastercard Payment Gateway Services) microservices handling high-throughput payment transaction processing
- Building backend services with **Java Spring/Spring Boot** and **PostgreSQL**, ensuring data consistency across distributed payment workflows
- Contributed to data migration efforts within the MPGS platform
- Implementing structured **logging** and **monitoring** solutions to improve observability and accelerate incident response in production
- Automating build and deployment pipelines using **Jenkins** CI/CD on **Linux** infrastructure
- Collaborating in Agile/Scrum environment with cross-functional teams on enterprise-scale fintech systems

Java Software Developer Intern

Nov. 2025 – Jan. 2026

Endava Vietnam

Ho Chi Minh City

- Developed internal financial management system using **Spring Boot**, **Keycloak**, Apache POI, and **PostgreSQL**
- Containerized applications with **Docker Compose** and established **GitLab CI/CD** pipelines
- Participated in Agile/Scrum ceremonies and contributed to code review processes

TECHNICAL SKILLS

Languages: Java, Python, C/C++

Frameworks: Spring Boot, FastAPI

Databases: PostgreSQL, MySQL, Redis

DevOps & Infrastructure: Linux, Docker, Docker Compose, Jenkins, GitLab CI, Git

Authentication: Keycloak, JWT, OAuth2

Message Brokers: Apache Kafka

Languages: English (IELTS 6.5)

PROJECTS

Bainansu – Financial Analysis Platform | *Lead Backend Developer* | [GitHub](#)

Jul. 2025 – Sep. 2025

- Architected microservices ecosystem with 8+ services using **Spring Boot** and **FastAPI**, supporting real-time financial data delivery
- Implemented real-time data pipeline with **Apache Kafka** and WebSocket, connecting to Binance API with smart resource management
- Developed asynchronous task queue with **Celery + RabbitMQ + Redis** for long-running tasks, enabling horizontal scaling
- Built full infrastructure: service discovery (Eureka), API Gateway, **Keycloak** auth, **PostgreSQL**, and payment integrations (VNPay, Stripe)
- Containerized entire application stack using **Docker Compose**

ADDITIONAL INFORMATION

Languages: English (IELTS 6.5)

Interests: Distributed systems, microservices architecture, cloud-native technologies
